Print, trace, cut and display

FigureNook | Halloween window silhouettes | US Letter

1. Print pages 2-4 at Actual size / 100%. Do not use Fit to page.
   US Letter paper: 8.5 x 11 inches. For A4, check the calibration square.
2. Measure the square below: each side should be 1 inch (25.4 mm).
3. Cut the outlines from the white printout to make tracing patterns.
4. Trace patterns onto black paper. Cut just inside your pencil line.
5. Repeat the bats to make a small flight across the upper panes.
6. Attach inside clean, dry glass with small loops of removable tape.
   Test tape in an inconspicuous spot and follow its surface directions.
7. View from outdoors at dusk with normal indoor lights switched on.

Included at 100%: large bat 7 in wide; two small bats 3.5 in wide;
cat approximately 6.5 in tall; crescent moon approximately 6 in tall.
The artwork is inspiration: shapes can be repeated, flipped or resized.
For a larger display, enlarge on a copier or use the pattern to sketch
a larger outline. Do not expect these single sheets to fill a whole window.

Use black paper or lightweight card, scissors, pencil and removable tape.
Adult supervision for scissors. Keep exits, window locks and vents clear.
Keep paper away from heaters and flames; use existing room lighting.
No craft knife is required. These are solid outer silhouettes with no
internal cutouts. The guide image is AI-generated styling inspiration.

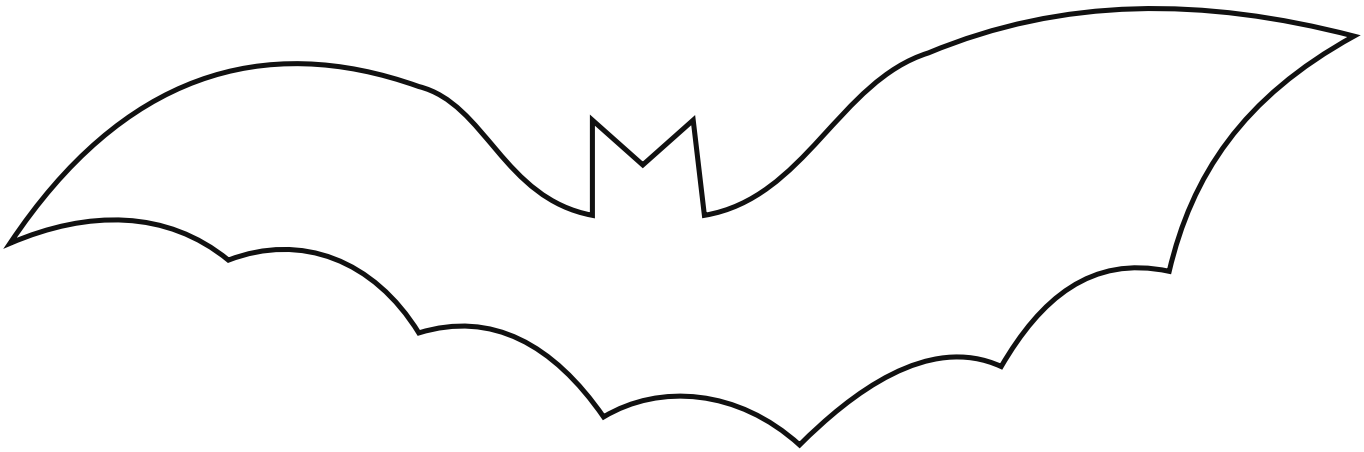

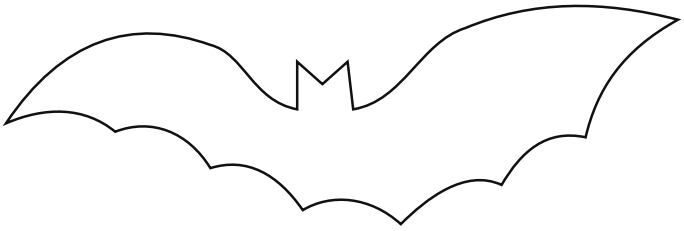

1 inch x 1 inch calibration square

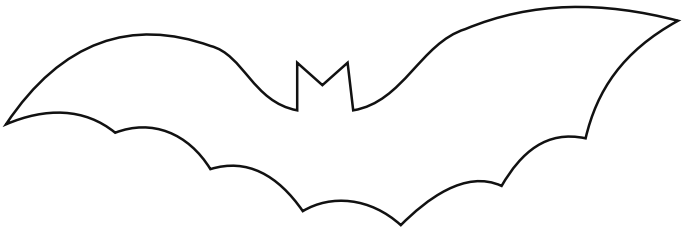

Bats - cut on the outline

FigureNook | Halloween window silhouettes | US Letter

1 large bat + 2 small bats. Print this page again for more.

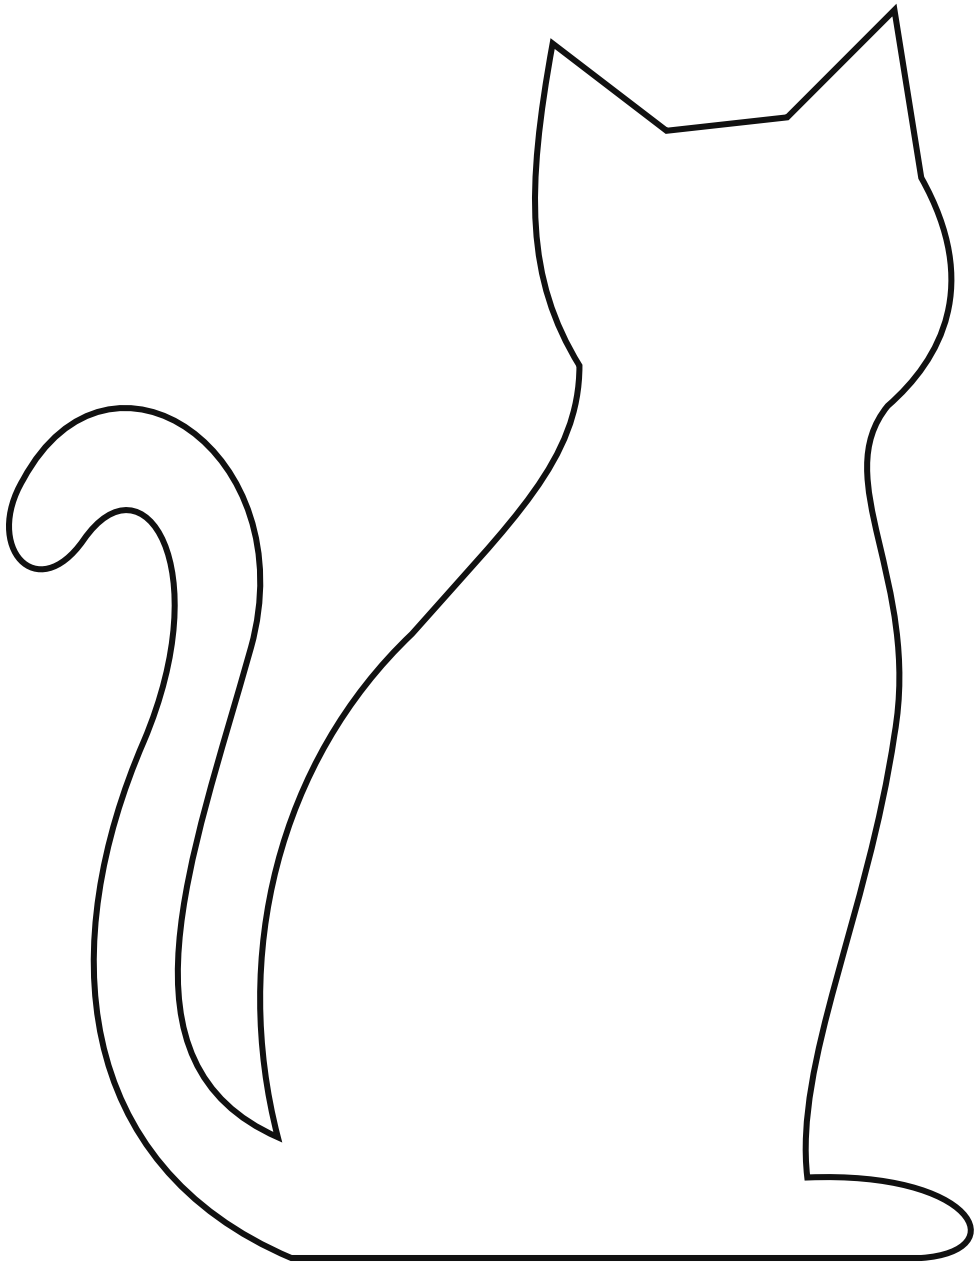

Seated cat - cut on the outline
