FIGURENOOK / FREE CRAFT PLANNER

One-sheet open gift-box base

Choose a square sheet. Wall height must be less than half the sheet side.
Base side = sheet side minus twice the wall height.
Try the layout on scrap paper before cutting cardstock.

Sheet side

Calculated base side

Gift size / fit notes

Scrap-paper trial and changes

Draw the base and wall strips. At each corner, cut one edge of the corner square to make a tab attached to one wall. Fold and glue the tab inside the adjacent wall.

The result is an open base. A lid or sleeve needs separate material.
Use for lightweight decorative gifts, not shipping or direct food contact.

Use tools on a protected surface and supervise children with cutting or scoring tools.
