A simple product-photo backdrop

Read the full guide before you begin. Use this worksheet to record your own measurements, quantities and choices.

SUPPLIES TO CHECK

White backing boards, stable table, daylight, phone, finished craft item

01 PLAN

Choose a stable table beside indirect daylight and clear the background. Put one plain board flat and support the second upright securely; keep it away from heat and ensure it cannot fall onto the product.

02 DETAILS

Place the craft a little in front of the upright board and turn it until shadows are gentle. Keep bright direct sun out of the frame. Use the phone's normal camera and clean the lens.

03 FINAL CHECK

Take a clear overall image and a close detail, then check color and sharpness before cropping. Do not edit a product so it appears to have features it lacks. This setup suggests original photography; it does not grant rights to third-party product images.
