12 oz coffee tumbler gifts: check the brewer clearance first

Brewer clearance and preferred serving-size worksheet. Download the matching printable below, then use the three-step plan. The featured product is optional.

Materials: Owala SmoothSip Slider coffee tumbler (optional featured product); Free matching FigureNook PDF; Paper and a pen; The actual item instructions and measurements

1. Start with the real item

Measure the space from the cup platform to the brewer's outlet. Check whether a removable tray changes the usable height according to the brewer's manual.

2. Use the matching plan

Compare the actual 12 oz SmoothSip Slider dimensions and intended serving size. Leave room to position and remove the cup without tilting a hot drink.

3. Finish and check

Use the worksheet to record brewer clearance, cup height and the recipient's usual serving. Confirm the exact selected tumbler option before checkout.

Check the exact selected option, maker directions, included pieces, current delivery and return terms before purchase. Other accessories shown may be separate.

Also needed: ruler or tape measure.
