A body-mist gift checklist for travel bags and dresser space

Measure the dresser spot or bag pocket first, compare it with the bottle's listed dimensions, check the current carry-on liquids limit for the trip, and pack the bottle upright and protected. The worksheet compares bottle and space sizes side by side and has a travel check and a packing check.

What you need

- The listing or box for the mist you are considering, open to its size and dimensions
- The toiletry bag, carry-on liquids bag or dresser spot it will go in
- A tape measure, the worksheet and a pen
- A sealable bag and soft items for packing

Steps

1. Measure the space
Ask where the bottle will live: on a dresser, in a toiletry bag or in a carry-on liquids bag. Measure the inside length, width and height of each space and write them in the table.

2. Compare the bottle with each space
Copy the bottle's dimensions from the current listing or measure it with the cap on rather than estimating from a photo. Tick a space only if the bottle fits upright.

3. Check the liquids rule for the trip
For U.S. flights, TSA limits carry-on liquids to containers of 3.4 ounces (100 milliliters) or less per item in one quart-sized bag. Check TSA, airline and destination rules for the actual trip, including any limits on perfume in checked baggage.

4. Pack upright and protected
Close the cap, stand the bottle upright in a sealable bag and cushion it with soft items. Keep it out of hot cars and direct sun, and follow any warnings on the label. The optional mist does not come with a bag, pouch or the props in the illustration.

Tips

- Listing dimensions may describe the bottle rather than its box; measure the box too if the recipient will keep the mist in it.
- TSA's perfume page says the officer at the checkpoint makes the final decision on whether an item is allowed through.
- The optional product link is an affiliate link. Check the selected size, current listing and return terms before buying. FigureNook has not measured the pictured bottle; the image is an AI concept.

Your worksheet

Bottle

Product, scent and size _____

Listed dimensions (length × width × height) _____

Box dimensions, if it will be kept boxed _____

Spaces

Measure the inside of each space. Tick only if the bottle stands upright with the cap on.

Space	Inside length	Inside width	Inside height	Fits upright?
Dresser spot				☐
Toiletry bag pocket				☐
Carry-on liquids bag				☐

Travel check

Date checked _____

Departure country, airline and route _____

Current carry-on limit per container _____

Bottle volume _____

Where the bottle travels ☐ Carry-on liquids bag ☐ Checked bag ☐ Not flying

Packing

- ☐ Cap closed, and spray locked if it has a lock
- ☐ Standing upright
- ☐ Inside a sealable bag
- ☐ Cushioned with soft items
- ☐ Out of hot cars and direct sun

About this sheet

Original AI editorial illustration depicting a design concept; review manufacturer specifications and product details for final suitability. Exact color, fit, performance and pictured accessories are not established by the image.
