# A holiday bathroom accent

### Protect the useful counter space

Start with the sink, soap, towel and other items guests need to reach. Measure a dry area away from splashes. Do not add decor where it makes the counter, faucet or electrical access awkward.

### Keep the pot dry

Check the selected faux plant and pot’s care instructions. If the pot is paper pulp, keep it dry and do not water it. Place the arrangement on a stable tray away from splashes, condensation, heat and flames.

### Test the layout

Run through handwashing and towel use before leaving the display in place. Move the plant if it gets splashed or blocks cleaning; inspect the pot for dampness over time. Keep any seasonal ribbon and all decorations away from heat and flames.

# Dry-zone counter layout

Record your own measurements and choices.

**Dry counter area and tray footprint**

**Soap / faucet / towel reach**

**Splash and condensation check**

**Heat and electrical access**

**Other notes / adjustments**

Keep decorations stable, dry and away from heat or flames.
