FIGURENOOK / FREE PROJECT WORKSHEET

A clay pumpkin photo stand for a fall memory

Wire-holder placement diagram | Planning only; not a full-size template

Materials

Air-dry clay, blunt tools, a washable surface, craft wire, pliers, wire cutters, paint and brush, a light paper mock-up, and compatible adhesive if needed.

1. Shape and plan

Make a low pumpkin with a broad flat base. Adults form the wire spiral and handle cutters; make a small mounting hole.

2. Check stability

Use a light paper mock-up before drying. Reduce its size if the stand tips. Follow clay, paint and adhesive directions.

3. Finish safely

Dry and paint as directed, then secure the wire if needed. Cover sharp ends; keep small parts away from children and pets.

YOUR PLAN

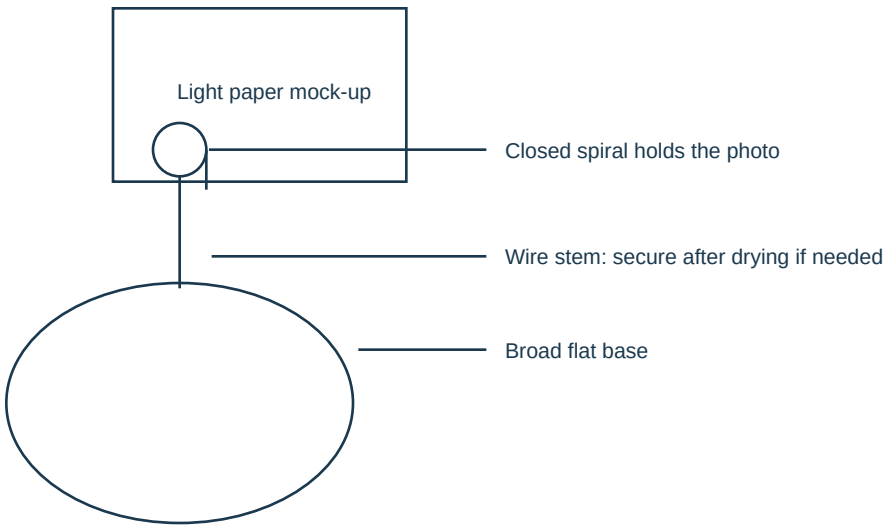
Base width _____

Photo width _____

Wire height _____

Drying / tip check _____

WIRE-HOLDER PLACEMENT (CONCEPT)



Follow product labels. This diagram does not establish stability or exact size.
