A last-minute ghost backdrop with lights set behind it

Printable ghost shapes and a light-spacing plan; no enclosed light covers. Use the free worksheet with the steps below. Compare the optional supply only if you need it.

Materials: White paper; pencil; tape suitable for surface; optional battery LED lights

1. Check before starting

Sketch broad ghost shapes on scrap paper and cut a trial. Measure the display area before making the rest.

2. Plan the arrangement

Attach paper using a surface-suitable method. If adding battery lights, position them separately on a stable open surface within maker instructions.

3. Finish and review

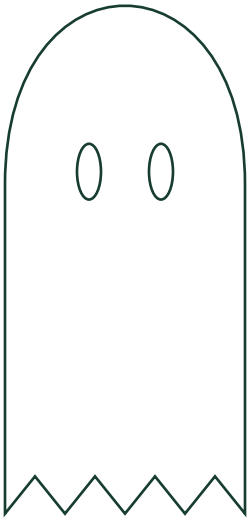
Keep paper clear of heat, vents and access routes. Try the arrangement with lights off and on; the printable remains usable without buying lights.

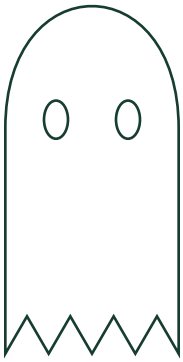
Follow the light maker's instructions and keep paper away from heat and flames.

Your printable workspace

1 inch

Print at Actual size / 100%. Check the one-inch square. Solid lines are cuts; dashed lines are folds. Trial on scrap paper. Keep paper away from food, heat and flames.





Your display layout

Cut around the solid ghost outlines. Keep eye shapes drawn or coloured if you prefer. Use the box to plan ghost positions and a separate stable open location for optional battery lights. Never wrap paper around a light.
