A one-box desk snack layout with a separate dip cup

Pack-by-compartment layout. Use this planning sheet with the full guide.

1. Lay out one actual compartment

Use one single-compartment snack box. Sketch the footprint of a separately sealed dip cup and check that the main lid closes without pressing it. A dip cup is a separate item; molded dividers are not included in the selected option.

2. Separate wet and crisp food

Put cucumber and carrots together, cheese in a suitable space and crackers in a separate dry liner or bag. Keep dip in its own closed cup. Use the layout sheet to change quantities for the box you actually own.

3. Plan the trip

Keep perishable snacks cold and use suitable cold sources and an insulated bag when refrigeration is unavailable. Follow the actual container's washing and reheating instructions. The image does not verify leak resistance.

Keep perishable food cold, follow actual food and container directions, and check ingredients and guest needs. Use the worksheet to organize ingredients and serving arrangements. Full instructions: figurenook.com/guides/a-one-box-desk-snack-layout-with-a-separate-dip-cup/
