Check the opening

Measure the doorframe and swing path. Plan decoration on only one side, outside hinges, latches, handles and walking clearance.

Choose separate fixings

Select lightweight fixings appropriate to the actual surface and follow their load and removal instructions. Test an inconspicuous area; removable does not guarantee damage-free.

Hang with clearances

Attach the ivy loosely without hanging loops across the doorway. Open and close the door fully and remove any strand that catches. Keep children and pets away from loose vines.

Important

Artificial foliage is decorative. Use separate suitable supports and fixings where needed, rated for the actual surface and load. Keep small parts, cords and vines away from children and pets, and keep access, ventilation and heat clear. Never use an open flame near foliage.
