A six-filter pack for multiple units: label each unit before restocking

A filter inventory prevents buying the right size for the wrong unit. Record each HVAC location and its actual approved filter requirements.

Fill the fields in a PDF reader, or print and write. Save your own copy; entries are not submitted to FigureNook.

Unit / room or return location

Nominal size / actual dimensions from label

Approved filter specification / manual reference

Installed date / maker-directed check / stock count

Use current product directions. No purchase or signup is required. Product illustrations are conceptual, not exact photographs.
