After Halloween: label and store the remaining fog fluid

Storage-location and manufacturer-label log; no invented shelf life. Use the three-step plan and the log on page 2.

Materials: Remaining fog fluid in its original labelled container; waterproof label, marker, storage bin and the fluid maker's instructions.

1. Start with the real item

Keep remaining fluid in its original closed labelled container. Do not mix formulas or transfer it into a drink bottle.

2. Use the matching plan

Read the exact fluid maker's storage instructions and any date or disposal information. Record the compatible machine rather than assuming every fog machine accepts it.

3. Finish and check

Attach the printable log to the storage bin, not over the product's warnings. Follow the maker's directions for storage and disposal; no shelf life is invented.

Follow the fluid maker's storage and disposal instructions. Keep children and pets away from stored chemicals.
