Build a one-scent-at-a-time fragrance layering journal

Printable notes and wear-test journal. No purchase or signup required.

Record one known scent

Write the exact name and format of a fragrance you already use. Copy the maker's notes separately from your own impression, because notes do not predict the experience for every wearer.

Observe before combining

Use the journal for one product at a time and follow its directions. If you later choose to compare layers, keep a record of what changed rather than assuming two popular scents work together.

Keep the purchase optional

The linked Cheirosa 62 option is a 3 fl oz mist. Check the selected scent and size.
