Candy bag weight is not a piece count

A bag-weight-versus-count shopping comparison; do not invent a piece count. Use the free worksheet with the steps below. Compare the optional supply only if you need it.

Materials: Candy package; planning sheet; optional kitchen scale

1. Check before starting

Read whether the listing promises a weight, a piece count or both. Record only the information actually stated.

2. Plan the arrangement

If only weight is stated, leave exact pieces unknown. Weighing the bag cannot establish a reliable number of mixed-size candies.

3. Finish and review

For a count-based event, select a stated-count pack or count your own wrapped pieces. Do not promise a count from a weight estimate.

Follow product and material directions.

Your printable workspace

Sketch your layout or compare the exact options

Guest count _____

Pieces per visitor _____

Reserve _____

Planned pieces = guests x chosen allocation + reserve

Stated bag weight

Stated piece count or unknown

Verified count needed

Record actual dimensions, contents and maker directions. The illustration is a concept, not an exact product photograph or hands-on test.
