Care for corduroy cushion covers before storing them

A cushion care-label and storage checklist. Use the free printable with the steps below. Compare the optional supply only if you need it.

Materials: Cushion covers; their actual care labels; suitable storage box; pen and inventory sheet

1. Read the actual label

Find the washing, drying and material directions for your selected cover. Do not use a generic temperature or cycle from an illustration. Note the directions on the worksheet before cleaning or storing it.

2. Handle zips gently

Remove inserts carefully and inspect the cover and zip. Turn or close components only as the maker's care instructions direct. Avoid forcing a zip around an overfilled insert or pulling the cover by a small decorative seam.

3. Store fully dry covers

Make sure the cover is dry according to its care directions before folding it for storage. Keep it in a suitable dry place with a label identifying the pair and size. Inserts are separate from the linked cover set.

Check actual dimensions, stability and material care. Keep access, electrical connections, heat and spill paths clear.
