Clay napkin rings shaped around a removable paper form

Original paper form and a step-by-step shaping plan; follow drying instructions. Download the matching printable below, then use the three-step plan. The featured product is optional.

Materials: DAS Modeling Clay Air Hardening, White, 2.2lb, 1 Count (optional featured product); Free matching FigureNook PDF; Paper and a pen; The actual item instructions and measurements

1. Start with the real item

Measure a loosely gathered cloth napkin and make a trial paper cylinder using the printable. The form is adjustable; the diagram does not prescribe a finished ring size.

2. Use the matching plan

Prepare DAS air-hardening clay according to its instructions and shape a decorative band around a suitable removable form. Avoid trapping the paper permanently inside the clay.

3. Finish and check

Remove the form only as the material instructions allow and let the ring dry fully. Decorative use only; do not assume food-safe, waterproof or dishwasher-safe properties.

Check the exact selected option, maker directions, included pieces, current delivery and return terms before purchase. Other accessories shown may be separate.
