Fold a perfume gift sleeve around the box you actually have

Make a measured paper sleeve for a boxed fragrance gift. The printable includes a working prototype net and a sizing formula for your actual box.

Fill the fields in a PDF reader, or print and write. Save your own copy; entries are not submitted to FigureNook.

Actual box width / depth / sleeve height

Paper wrap length = 2 x (width + depth) + overlap

Trial fit / chosen overlap / final dimensions

Message / removable closure / label kept readable

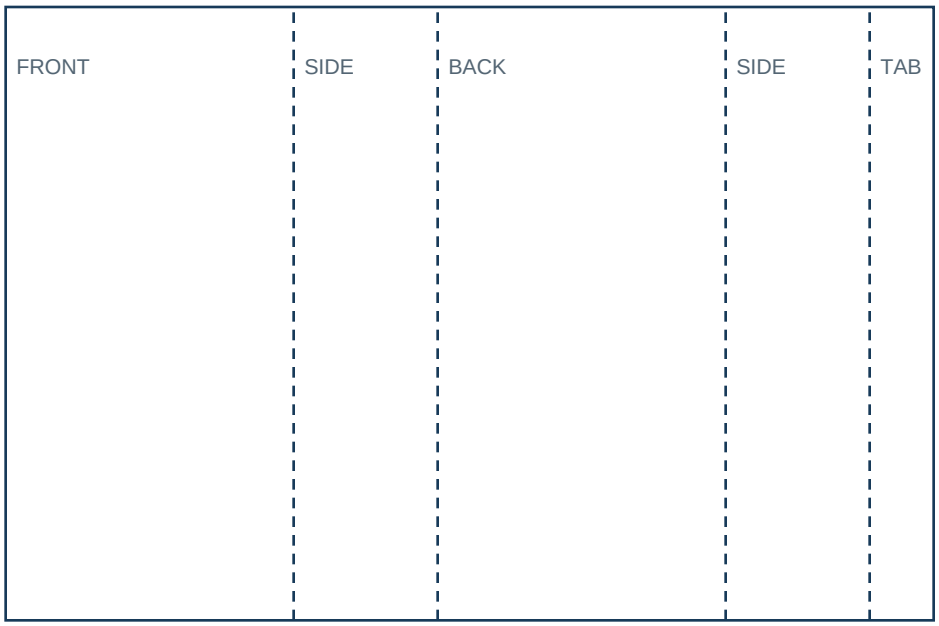
Use current product directions. No purchase or signup is required. Product illustrations are conceptual, not exact photographs.

Perfume gift sleeve - size-trial net

Solid lines: cut outline. Dashed lines: fold or design guide. Check the scale before using.

This prototype wraps a 1.5 x 0.75 inch rectangular box, with a 3.19 inch sleeve height and a 0.33 inch overlap. It is NOT a fit claim for any perfume box.

For your box: panel widths = W, D, W, D, then an overlap. Total paper length = 2W + 2D + overlap. Choose a sleeve height that keeps required labels accessible.



Print, cut the outside rectangle and fold all dashed lines. Test on scrap paper. For a larger box draw a new net with your measured dimensions; do not scale this page blindly.

1 inch print check
