Folded bat labels for a Halloween buffet

Free foldable label PDF; check printer paper limits and trial-print. Use the free worksheet with the steps below. Compare the optional supply only if you need it.

Materials: Cardstock or paper; printer; scissors; pen

1. Check before starting

Check printer paper limits and print one trial at actual size. Write the food name and keep any ingredient information readable.

2. Plan the arrangement

Cut the broad outer outline and fold the centre tent line. Keep a wide stable base rather than narrow fragile bat wings.

3. Finish and review

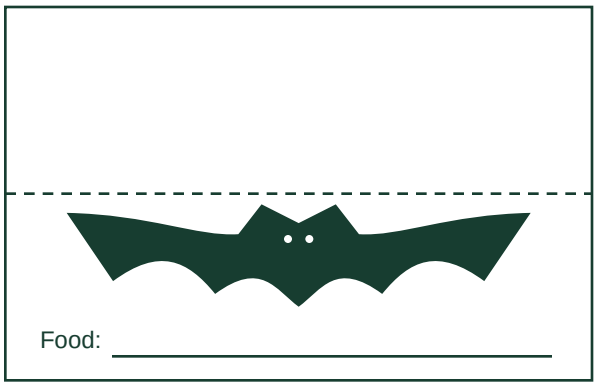
Place labels beside food, away from moisture, flame and direct contact with ingredients. Adjust the size after a trial.

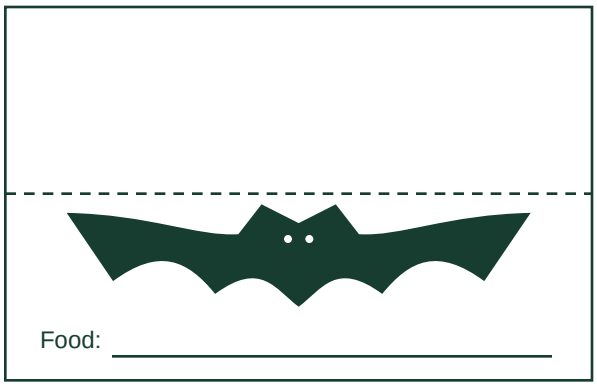
Follow product and material directions.

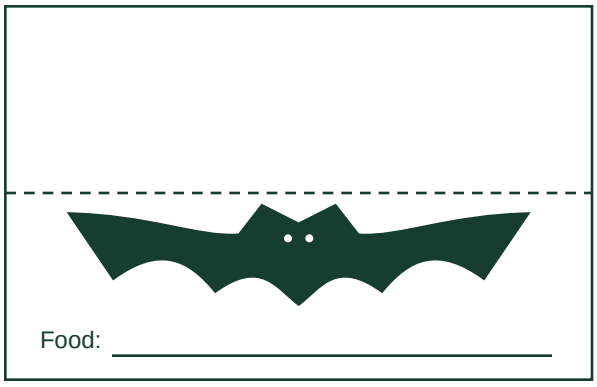
Your printable workspace

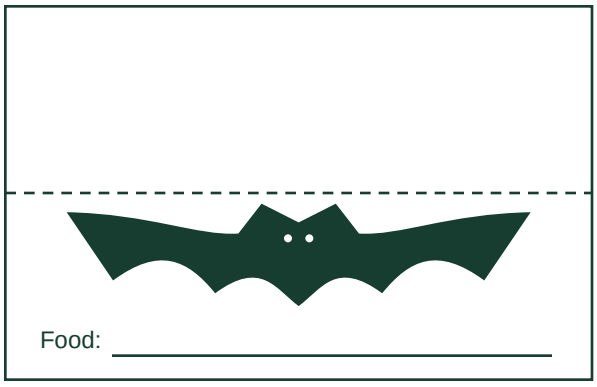
1 inch

Print at Actual size / 100%. Check the one-inch square. Solid lines are cuts; dashed lines are folds. Trial on scrap paper. Keep paper away from food, heat and flames.









Cut the four outer rectangles. Fold each dashed centre line so its bat graphic and food-name space face outward. The blank back panel supports the tent. Trial one card before printing the set.
