Initial-stamped clay star ornaments

Star template and hole-position diagram. Use this planning sheet with the full guide.

1. Trace the star

Use the two-inch star outline at actual size. Roll a small sheet of air-dry clay to an even maker-permitted thickness and cut a simple star with rounded points using suitable tools.

2. Mark the initial and hole

Press one initial lightly near the centre. Make a hanging hole away from the edge with enough material around it. Stamp tools, ribbon and cutters are separate unless explicitly included with the clay.

3. Dry and hang lightly

Let the ornament dry fully as directed before adding compatible colour or a ribbon. Hang only where the support suits the actual weight. Keep small ornaments and loops away from children and pets; decorative clay is not edible.

Follow the actual material and tool directions. Decorative clay, foliage and paper are not food-safe or flame-safe by default. Use suitable supervision and keep small pieces away from children and pets.

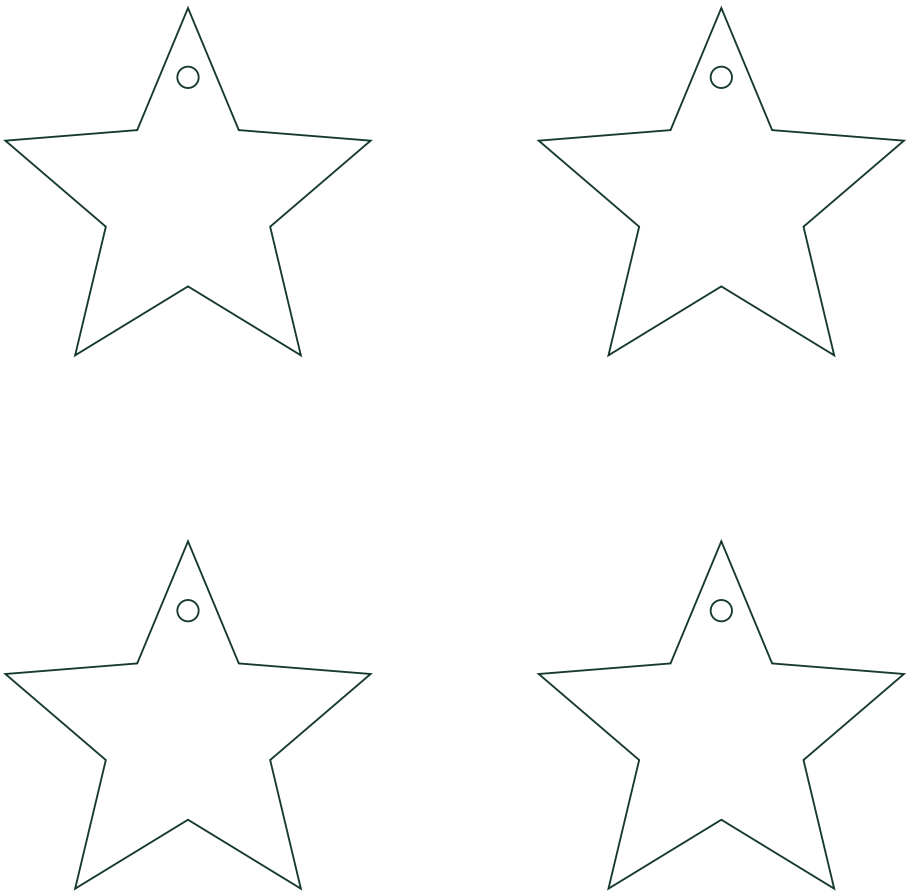
Your printable workspace

Print at 100% / Actual size. Check the one-inch square. Solid outline = cut; dashed line = fold only. Templates are for craft planning; never put printed paper in the oven.

1 inch



Use age-appropriate tools and follow material drying instructions.
