FIGURENOOK / FREE PLANNING WORKSHEET

Kindle as a gift: decide who owns the account before wrapping

Use this four-part checklist to record the recipient's needs, check the exact model's documentation and prepare a useful gift or handover.

1. Confirm the reader and book source

Ask whether the recipient wants an e-reader and already uses a particular bookstore or library service. Check availability of several books they want. A gift should fit their existing reading routine, including accessibility and language needs.

2. Keep device ownership with the recipient

At checkout, examine any account-linking option and the current gifting instructions. Avoid loading personal accounts or buying books for the recipient through your own account without agreement. If a device is already linked, follow Amazon's official deregistration instructions before transferring it.

3. Check what the box contains

Record the exact model, storage option, included cable and any required charger or case. Keep setup information and proof of purchase with the gift. Avoid opening sealed packaging merely to perform personal account setup for someone else.

4. Make a private setup handover

Give the recipient the official setup link and time to sign in privately. Do not write passwords or payment details on the printable. Note optional subscriptions as separate costs and preserve the receipt and current return terms.

Record your comparison

Exact model / product / recipe

Documented requirement and source

Recipient preference / available space

Included items and extra cost

Unresolved question / next action
