Leaf-imprint clay name tags for Friendsgiving

Leaf outline and name-placement sheet. Use this planning sheet with the full guide.

1. Choose a clean leaf

Trace a leaf outline on the template and decide where a name will fit. Roll air-dry clay to a thickness permitted by the maker, using an even surface and suitable tools. Leaves and craft materials stay away from food.

2. Imprint and cut

Press a clean textured leaf lightly into the clay and lift it away. Cut the simple outline with an appropriate tool. Make a ribbon hole near the stem while leaving enough clay around it to avoid a weak edge.

3. Finish the name area

Let the tag dry fully according to the clay directions before adding a compatible marker or paint. Keep names readable and let finishes cure as directed. Use as a decorative tag, not a food-contact coaster.

Follow the actual material and tool directions. Decorative clay, foliage and paper are not food-safe or flame-safe by default. Use suitable supervision and keep small pieces away from children and pets.
