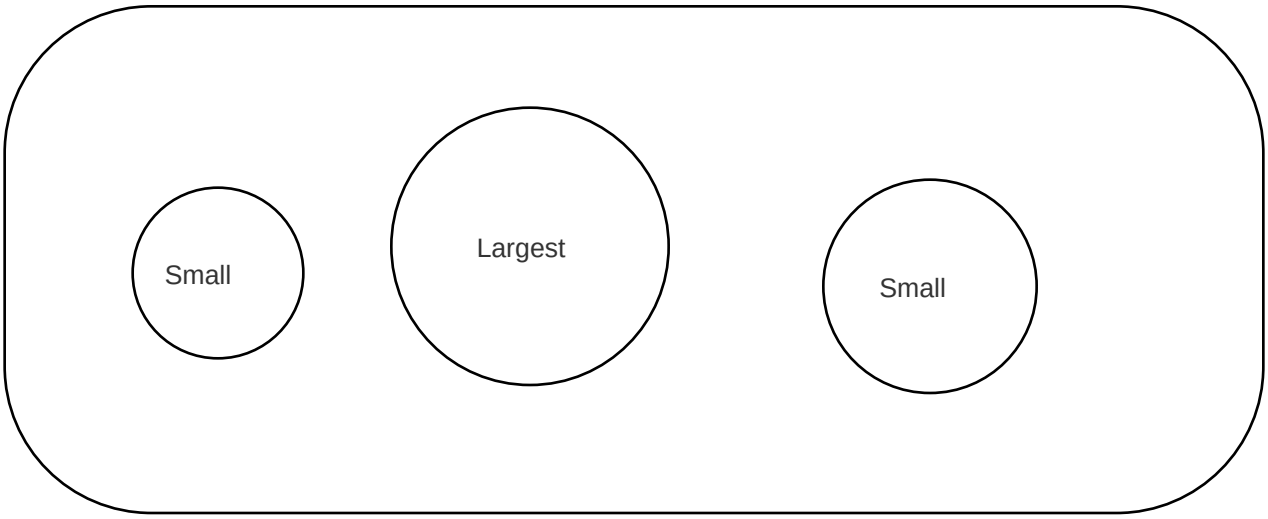
Low Fall Centerpiece - Layout Plan

A placement sketch, not a scale pattern or a required tray dimension.

1. Set plates first; measure the clear center area.



2. Place three low accents inside a shallow tray.
3. Add a few faux leaves, leaving gaps.
4. Sit down and check sightlines from both ends.
5. Keep decorations separate from food and utensils.
6. Lift the tray away if you need more serving space.

No real candles, heat sources or hot dishes in the display.

Keep small decorative pieces away from children and pets.
