Make a reusable marigold garland

reusable marigold garland layout. No purchase or signup required.

Plan the span before attaching flowers

Measure the intended display area and draw a short garland on the printable. Decide the number of flowers and spacing before assembling; the optional listing contains 50 artificial heads with stems.

Try a removable attachment

Test wrapping the flexible stem around a cord loop without adhesive. If that stem does not hold securely, use a suitable reusable craft tie and follow its instructions. Do not force or sharply bend a brittle stem.

Hang lightly and store for reuse

Use fixings rated for the surface and actual load. Keep the garland away from flames, heat, children and pets. Remove and store dry after the display; follow the cultural purpose of the occasion when choosing placement.

YOUR PLAN

Display span _____

Flower count _____

Spacing _____

Attachment trial _____

Safe fixing and storage _____
