Make a snack-prep inventory before buying another set

Container and lid inventory sheet. No purchase or signup required.

Count usable sets

Gather clean boxes and matching lids. Count a container with a lid as one usable set; do not confuse a retailer's piece count with the number of containers.

Check the missing pieces

Record cracked containers, damaged seals and missing lids separately. Keep only food-contact items in good condition and follow the maker's replacement advice.

Buy for the actual gap

Compare the count and sizes you need with what a proposed set includes. A smaller missing size or replacement lid may solve the problem without another full set.

YOUR PLAN

Container _____

Capacity _____

Matching lid _____

Condition _____

Actual gap _____
