Measure pillow inserts before choosing new covers

A printable insert and cover measurement sheet. Use the free printable with the steps below; compare the optional supply only if you need it.

1. Remove the cover

Measure the insert seam to seam without counting decorative flanges. Record its shape and dimensions; do not estimate size from a styled photograph.

2. Read both specifications

Compare the actual cover dimensions and seller's fit guidance with the insert maker's advice. There is no universal rule that every insert should be larger by the same amount.

3. Check the closure

Trial the existing insert gently and stop if the zipper is strained. Compare the exact selected option before buying; the linked product is a pair of covers, not a filled cushion set.

Check actual dimensions, stability and material care. Keep access, electrical connections, heat and spill paths clear.
