Scalloped clay medallions for Thanksgiving decor

Four scalloped shape references with suggested ribbon holes and initial fields.

1. Cut the scalloped outline
Print a trial template and confirm the scale square. Roll the clay evenly and cut a simple sturdy scalloped shape. Keep the curves broad so they are easier to smooth and less likely to break than sharp points.

2. Add the initial and hole
Stamp lightly without thinning the medallion. Make the ribbon hole before drying, leaving a sturdy clay bridge. Follow maker directions for drying and any paint or finish before threading.

3. Display away from food
Tie the dried medallion to a chair back or gift package away from plates, food and eating utensils. Do not attach decorative clay to napkins or food-contact items. Keep small parts and ribbon away from children and pets.

Follow material and tool instructions. Decorative clay, paper and wire are not food-safe or flame-safe by default; supervise tools and keep small parts away from children and pets.

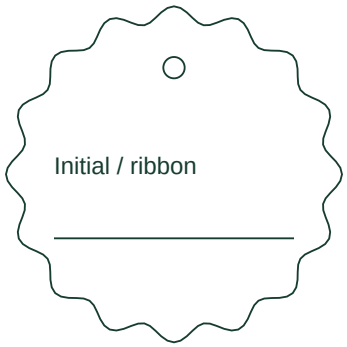
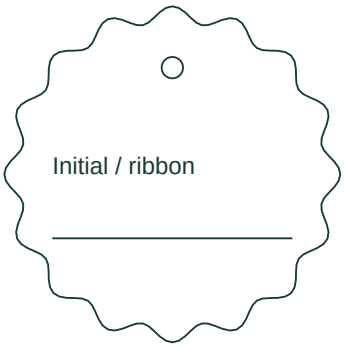
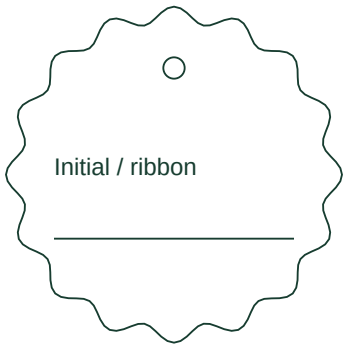
Your printable workspace

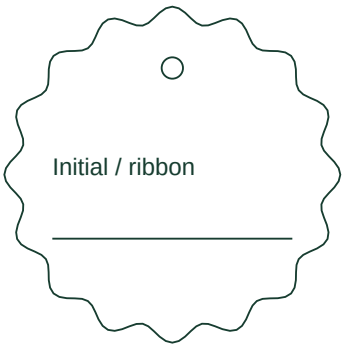
1 inch

Print at 100% and verify the square. Outer shapes are references; small circles suggest holes and interior lines are for notes. No folds. Display the clay away from food, napkins and children.









Decorative medallions. Trial hole and ribbon before drying.
