Separate crunchy toppings for make-ahead yogurt snacks

Wet-versus-dry packing plan. No purchase or signup required.

Choose the base and crunch

Keep yogurt and washed fruit chilled. Put granola, seeds or other crunchy toppings in a separate dry food-safe container. Check ingredient and allergen labels.

Check the lids

Close each container without pressing food into the seal. Keep a clean spoon separately and carry the chilled portion with a cold source when needed.

Finish at the table

Add the dry topping just before eating. The printable separates base, fruit and crunch so you can vary the snack without buying a different storage set.

YOUR PLAN

Base _____

Fruit _____

Topping _____

Pack separately _____

Serving time _____
