Halloween snack planner: 6, 12 or 18

Read the full guide before you begin. Use this worksheet to record your own measurements, quantities and choices.

SUPPLIES TO CHECK

Planning sheet, pencil, chosen serving dishes, food-safe containers, ingredient labels

01 PLAN

Treat the worksheet as arithmetic, not a nutritional serving recommendation. Write your own per-person amount for each food after checking your guest ages, allergies and whether a meal is also being served.

02 DETAILS

For six guests multiply that chosen amount by 6; for twelve multiply by 12; for eighteen multiply by 18. Convert the result into actual package quantities and allow for the number of pieces in each package.

03 FINAL CHECK

Prepare only a manageable first serving and keep extra perishable food chilled. Note actual leftovers after the event so next time your quantities are based on experience rather than a generic party estimate.
