Paper haunted-house luminaries

Read the full guide before you begin. Use this worksheet to record your own measurements, quantities and choices.

SUPPLIES TO CHECK

Cardstock, ruler, scissors, adhesive, enclosed LED light with secure battery compartment

01 PLAN

Draw a simple four-wall strip with an extra glue tab and a flat base. Keep windows broad and leave enough wall around each opening to support the roof. Fold a plain-paper prototype first.

02 DETAILS

Cut the windows before assembling. Score folds with a suitable tool and ruler, then join the tab to the opposite wall. Fit a loose removable paper roof so the light can be reached without tearing the house.

03 FINAL CHECK

Place only an enclosed LED light intended for decorations inside, following its instructions and leaving ventilation as required. Never use candles or hot bulbs. Keep batteries and small parts inaccessible to children.
