Ribbon-bow mini wreath

Read the full guide before you begin. Use this worksheet to record your own measurements, quantities and choices.

SUPPLIES TO CHECK

Small frame, ribbon, scissors, suitable short ties, measuring tape

01 PLAN

Measure the chosen frame and make one sample bow from the actual ribbon. Note how much ribbon it uses including tails. A wide bow may need fewer repeats than a narrow bow.

02 DETAILS

Lay the sample around the frame and choose your own spacing. Multiply the measured ribbon per bow by your chosen number of bows, allowing for trimming rather than assuming a universal ribbon length.

03 FINAL CHECK

Tie bows securely to the frame with short ends and inspect for loose pieces. Keep indoors unless every material is suited to the intended conditions. Keep away from heat and small children; this is a decorative craft concept.
