Three cardigan measurements before ordering

Read the full guide before you begin. Use this worksheet to record your own measurements, quantities and choices.

SUPPLIES TO CHECK

Comfortable cardigan, measuring tape, seller size chart, worksheet

01 PLAN

Lay a comfortable cardigan flat without stretching. Measure underarm to underarm and record that as a flat garment width, not a body circumference. Double it only if the seller uses garment circumference.

02 DETAILS

Measure sleeve length using the same starting point as the seller chart, and body length from the specified shoulder point to the hem. Drop-shoulder garments may use a different sleeve reference.

03 FINAL CHECK

Compare like-for-like measurements and check whether the chart describes body or garment dimensions. Review size-specific color availability and return information. This worksheet reduces guesswork but cannot guarantee fit without trying the garment.
